

HOUSES of WORSHIP

Aloma United Methodist, Winter Park, FL

Deliver a Powerful Message.

Small or large, today's Houses of Worship are all about communicating effectively with your audience. How do you ensure your congregation's attention and participation? How do you get your message out to both a larger and more diverse audience? By mixing state-of-the-art technology into your traditional setting, you can guarantee that you will have the attention of your entire target audience, contemporary and traditional. Large-format digital and projection display systems that provide a clear view from any seat in the house. Powerful sound reinforcement combined with expert control systems to clearly amplify your speaker, band, and choir. Even the ability to broadcast your sermons to remote locations, or record them for later editing and reproduction in your own full-fledged production suite.

How do you get your message out?

Imagine your voice, amplified by thousands of watts of power driving carefully placed loudspeakers. Imagine being clearly seen, even by the farthest audience members, through strategically-mounted projection screens. Every expression is seen; every nuance in tone is heard. With customized, high-quality sound reinforcement, digital display and projection systems, and full automation, you can guarantee that your message will be delivered effectively.

Houses of Worship

Take it to a Higher Level

At Teer Engineering, we specialize in bringing state-of-the-art technology into today's modern Houses of Worship. We are a true full-service provider, offering expert design services, systems acquisition and installation, training, and maintenance contract services.
