

# RETAIL & RESTAURANT

Red Brick Pizza, Kissimmee, FL

## Transform the “Storefront” into an *Experience*.

Retailers and restaurant proprietors today have to do more than simply display and sell product, they need to deliver a total experience to their customers – lighting systems that accent your storefront and establish the mood, digital signage and video systems to communicate with your customers and provide entertainment, and music delivery systems that enhance the vibe for your patrons and customers. The mere dining and shopping event is now transformed into a memorable experience.

• **When is your business more than  
• just a storefront?**

▼ When it gives your customers the sense of entering a full-fledged experience, not just another retail location. Set the mood with a high-tech background music system and a time-sensitive, automated lighting control system. Show off your wares and promote your products with digital signage displays. Or perhaps your patrons will appreciate the large, entertainment displays showing the latest sports or news events, even the one conveniently installed at their own table.
