

# CORPORATE & TRAINING FACILITIES

Hanover Capital Partners LLC, Orlando, FL

It's NOT just a meeting anymore.

In the past, it was no more than a room with a table. No one would have imagined the evolution of the modern corporate conference room, or the technology of the modern training facility. Crystal-clear digital projection and display systems. Wireless sound reinforcement. Video conferencing. And automation of everything from lighting controls to motorized window screens. No longer just a meeting space, it has now become the centerpiece of communication and presentation – the ability to immerse your target audience in an environment ideal for delivering your message or promoting collaboration.

## Close the Deal

The stage is set – the players are seated, and now it's your chance to shine. Your presenter calmly walks over to a sleek, LCD screen control panel and presses a single button. All at once, the lights darken, the shutters quietly lower and close, the projection screen is revealed. Your audience knows you're prepared - they're in for something good. As the presentation commences, your presenter is free to move about and speak naturally, equipped with a discreet wireless microphone playing back through crystal-clear overhead speakers. Bright, sharp projectors and digital plasma displays reinforce the message and wow the audience. You make your final pitch. The screen retracts and the lights come up. Applause.

# Corporate & Training Facilities

## Evolutionary
