

VENUES & PRODUCTION FACILITIES

Crane's Roost Park, City of Altamonte, FL

The Art of Creation

In the production world, delivering a flawless product is an absolute necessity. Whether you're talking about sound and video effects editing in a film dubbing and production facility, or lighting and sound reinforcement in a live entertainment venue, quality is a must. Having the technology and systems to deliver that perfect product is, therefore, non-negotiable. The partner you choose to design, install, program, and maintain those systems has to be versed in the latest technology and gear, have the experience to get it done right the first time, and have the competence to get you rolling fast. That's perfection.

• Automation,
• Integration,
• Celebration

It's the event of the season. A capacity crowd has gathered. The entertainment has arrived and is ready to roll. Will your audio/visual system deliver? It does. Loud, crystal-clear sound, in every part of your venue, no matter how out of the way. Uniform coverage and perfect alignment. Reliable power delivery throughout the facility. Bright video projection systems, informative digital displays, robotic lighting fixtures, even fireworks, all synchronized and automated, and at your fingertip's immediate control. They don't even notice the technology – they're too busy being dazzled. The crowd goes wild. The event is a ringing success. Ain't automation grand?

Venues & Production Facilities

Crowd Pleasers

At Teer Engineering, we specialize in bringing state-of-the-art technology into today's modern Production Facilities and Venues. We are a true full-service provider, offering expert design services, systems acquisition and installation, training, and maintenance contract services.

We offer:
